

Lumicrest LED strip lights bring energy savings, bright clear light, and long life reliability.

Want ultra-smooth lighting without the look of LED “dots”? Our new 350 LED/meter High CRI flexible strip is just what you need. When used in any Aluminum Channel with diffuser, the lighting effect is perfectly uniform. You can even put these strips in a low profile channel / diffuser (about 8 mm. high) without seeing any “dots”.

Get the Lumicrest Advantages

Clients who have compared our Lumicrest Pro Series High CRI Flexible Strip Lighting LED strips to those of our competitors choose Lumicrest because of the high brightness, uniformity and colour purity of our products. It comes with 1750 (!) bright LEDs in a standard 5 meter roll (16.4 feet) and can be cut to length in just 2 cm increments.

Perfect for galleries, museums, hotels, resorts, offices, retail environments and residences.
