

Lumicrest LED lights bring energy savings, bright clear light, and long life reliability.

The PAR30 you've been waiting for! With bright and adjustable directional light plus high CRI for accurate color rendering, it's perfect for galleries and museums, as well as retail and hospitality environments.

While ordinary bulbs burn out quickly and produce more heat than light, our LED PAR30 consumes only 16 watts, six times more energy efficient than halogen lights - for maximum energy savings.

Our remarkable new Apturi² Adjustable optical system is unlike anything you've seen before. The Precision Focus design captures more light from the LED and directs it outward with minimal glare, at a beam angle anywhere between 15 and 60 degrees.

Note: The Adjustable Par30 is designed for use in track fixtures. Not for use in recessed light/potlight fixtures.

Get the Lumicrest Advantage

Features and Benefits:

- 1225 lumen output in 3000K clean white at 95+ CRI
- Adjustable optics give more brightness and less glare
- Lens can easily be adjusted to other angles
- Shatter and vibration proof - no filaments or glass
- Simple retrofit to existing fixtures (medium base)
- Single LED eliminates multi-shadowing
- Rugged construction
- Uses only 16 watts of power
- Emits no UV or IR rays
- Contains no mercury
- UL listed for USA and Canada
- CE and RoHS compliant
- Integrated modular power driver
- 15 to 60 degree adjustable beam angle range
- Generates bright soft white light
- No heat emitted in the beam
- Dimmable, for maximum lighting control
- Attractive, clean design

Perfect for art galleries, hotels, resorts, retail environments and more.

Item	Dimensions (mm)	LED Type	Dimmable	Colour Temperature	CRI	Lens Angle Range
