

Introducing the new 10 Watt high CRI (95+) Integrated LED track head.

Designed to be a complete LED track lighting solution for discriminating museums, art galleries, retail stores and residences.

The Luminus 95+ CRI LED is integrated seamlessly with the fixture, heat sink and dimmable driver electronics to create an elegant and discreet lighting system for track installations.

It consumes only 10 watts and produces 650 lumens of light. The strict colour binning control applied by Luminus ensures that the light from each of our Integrated LED track heads will look the same from one to the next.

You can easily change the Apturi optical lens from one beam angle to another to adapt to different requirements (from spot lighting to flood lighting). Lenses are available in 25, 40 and 60 degrees. Simply unscrew the front part of the light and put in a different lens.

Compatible with H-type track systems (halo-compatible). Other types may be available upon request.

Dimmable with a variety of leading-edge dimmers.
