

Lumicrest's BUILDERZ LED Flexible Strip/Tape Lights are a high quality and affordable option for near-dotless LED lighting, available in the most commonly requested colour-temperatures of 2700K, 3000K and 4000K. With a CRI (Colour Rendering Index) between 90-95 CRI, they provide accurate colour rendition and strong illumination suitable for most applications, all at an accessible price point.

The BUILDERZ LED strips have 320 LEDs per meter (100 per foot) with a continuous phosphor coating over them. They look best when installed in an aluminum profile/diffuser (such as Lumicrest Workhorse or Anvil models) to achieve a completely uniform appearance with only 1/4" depth.

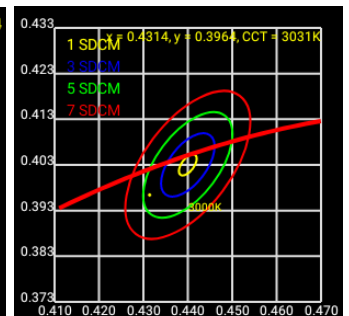

For your convenience and ease of use, each 5 meter (16.4 foot) reel comes with 8 inch wire leads on each end of the strip. If you cut the strip in two pieces, you will have a wire on each piece.

Typical spectral and colorimetric performance at 3000K
