

**Sleek high brightness square profile 3535 suspended or surface-mount LED lighting**

Perfect for illuminating offices, public spaces, signage and other areas requiring bright lighting.

Lumicrest's 3535 LED linear luminaires provide bright, uniform lighting with a clean crisp profile design with an anodized aluminum finish.

It's called 3535 because the profile is 35mm square.

**SIMPLE INSTALLATION**

*Aircraft cable suspension system (2 included)*

*Slides along slot in top of light for easy positioning*

*Suspension height easily adjusted at ceiling end*

**POWER SUPPLY OPTIONS**

*40 watt plug-in*

*60 watt plug-in*

*60 watt hardwire*

*60-100 watt AC dimmable hardwire*

Lumicrest's sleek and elegant LED linear lights are available in custom lengths from 20" to 8 feet (50cm-250 cm). The LED lights inside the fixture are powered by low-voltage 24 volts DC, and are powered by a remote-mounted power supply unit via low-voltage wire. All power supplies are class 2, cULus certified units that meet North American safety regulations.

Choose from a wide selection of LEDs with intensities up to 3,300 lumens/m. in a range of colour temperatures from 2,700K to 4,000K.

For example, a 48" linear light with brightest LEDs installed would have over 4,100 lumens of LEDs inside.

Comes complete with surface mounting clips or aircraft-cable suspension wires. Standard suspension wire length is 10 feet (3 meters) Longer wires are available upon request.

May be dimmed with optional PWM dimmers, or standard wall dimmers (Lutron etc.) depending on your choice of power supply.

units	Light Dimensions (not including power supply)
imperial	1.35" x 1.35" x length (up to 98.5") & can be joined to make longer units
metric	35mm x 35mm x length (up to 2.5 meters) & can be joined to make longer units
