

High Output Dimmable Integrated Track Light

38 Watt 24 Volt DC

This versatile 90 CRI integrated LED track head with an astonishing 3,500 lumens, is designed to be a complete optimized LED track lighting solution for office spaces, retail shops and residences.

Integrated seamlessly within the fixture is the heat sink and driver electronics creating an elegant and discreet lighting system for track installations.

It is available in a professional and modern-looking powder-coated black body.

Top Lumicrest quality:

This track light combines high output with high quality CRI 90 light, for good colour rendering suitable for most common applications.

Lens:

This light is exclusively available with a 40-degree lens, providing a medium beam suitable for most use cases.

Colour temperature:

This light offers a CCT of 3000K (clean white). Also excellent for most use cases, clean white is easy on the eyes while providing good colour.
