

Modular Linkable LED Lighting System

Modular high brightness LED lighting

Update your lighting and save energy with a unique new high brightness modular LED low-voltage lighting system. Perfect for under-cabinet lighting, retail displays or even general lighting.

Modular connectors on each EasyLinx LED Light Bar allow fast connections for quick and easy installation with mounting clips or suspension hardware, providing a near-continuous ribbon of clean bright light.

You can join them inline, in L or T configurations. You can even go from the wall to the ceiling, with a single low-voltage electrical connection.

Lights are available in 6", 12", 24", 39.3" (1 meter) and 48" modules. Up to 20 feet (6 meters) can be powered from a single 90 watt power supply.

Color Temperatures:

- 3000K clean white, at 95+ CRI
- 4000K natural white, at 95+ CRI

Requires a 24V DC Power Supply. For example:

Inline Dimming on/off switch

Modular connectors to join EasyLinx LED bars

Various length LED modules

Inline Touchless on/off switch

See TLXlighting.com for more power supply options.
