

SIMPLE INSTALLATION

Aircraft cable suspension system (2 included)

Slides along slot in top of light for easy positioning

cable height adjustment

Suspension height easily adjusted at ceiling end

POWER SUPPLY OPTIONS

40 watt plug-in

60 watt plug-in

60 watt hardwire

60-100 watt AC dimmable hardwire

The sleek and elegant Lumicrest LED suspended linear tube lights are available in custom lengths from 20" to 8 feet (50-250 cm). They are powered by a remote-mounted power supply unit via low-voltage wire. All power supplies are class 2, cULus certified units.

Choose from a wide selection of LEDs with intensities up to 3,300 lumens/m. in a range of colour temperatures from 2,700K to 4,000K.

For example, a 48" linear tube light with brightest LEDs installed would have over 4,100 lumens of LEDs inside.

Comes complete with aircraft-cable suspension wires. Standard suspension wire length is 10 feet (3 meters) Longer wires are available upon request.

May be dimmed with optional PWM dimmers, or standard wall dimmers (Lutron etc.) depending on your choice of power supply.

units	Tube Light Dimensions (not including power supply)
imperial	2.35" x length (20" to 98")
metric	60 mm diameter x length (50 cm to 2.5 meters)
