

Lumicrest Medium Brightness LED self adhesive flexible strip lighting is perfect for accent lighting and applications where higher brightness is not desired.

It can be used to enhance ambiance in hospitality applications, for stairway and railing lighting, in displays, cabinets and shelving, museum cases, health care lighting systems and much more.

It can be cut every 6 LEDs, or run as long as 16.4 feet (5 meters) in a single strip.

Its 24 volt DC operation minimizes voltage loss, providing consistent LED brightness over the entire length of the strip.

Features and Benefits:

- 1875 lumens per 5 meter strip
- Shatter and vibration proof - no filament
- 3M professional grade self-adhesive backing provides easy and secure application
- Emits no UV or IR rays
- Contains no mercury
- Low profile, unobtrusive
- Perfect for accent lighting, jewelry cases, retail displays, museum cabinets, health care lighting and more
- Low heat emission - will not damage sensitive items
- High quality LEDs for optimal lumen maintenance
- Low power consumption
