

Lumicrest LED lights bring energy savings, bright clear light, and long life reliability.

With bright and adjustable directional light, plus high CRI for accurate color rendering, the Lumicrest Saffire Modular Downlight is perfect for residences, art galleries, retail and hospitality environments, and more.

These Modular Downlights have a wide selection of trim-rings for a variety of applications, from fixed to gimbal, to deep-recessed trims.

The color temperature of the light can be Clean White (3000K), Natural White (4000K), or Dim-To-Warm (2200K-3000K), which mimics the behaviour of an incandescent bulb. Dim-To-Warm is excellent for creating flexible and attractive mood lighting.

Note: This 12 watt version of the light requires more clearance, as it is deeper than the 8 watt version.

Get the Lumicrest Advantage

Features and Benefits:

- Over 900 lumens in 4000K at 90+ CRI
- Apturi optics give more brightness and less glare
- Lens can be swapped to other angles
- Single LED eliminates multi-shadowing
- Rugged construction
- Uses only 12 watts of power
- ETL listed for USA and Canada
- Accompanying modular power driver
- 25, 35 and 60 degree interchangeable beam angle
- Dimmable, for maximum lighting control
- Attractive, clean design

Perfect for art galleries, hotels, resorts, retail environments and more.

Item	Dimensions (mm)	LED Type	Dimmable	Colour Temperature	CRI	Lens Angle Range
