

Sleek high brightness, low profile suspended LED lighting system

Perfect for boardrooms, offices, reception desks, retail environments and more, Lumicrest's suspended LED linear lighting systems provide bright, uniform lighting with a clean low profile design.

The Slipstream is available in one meter or two meter standard lengths, or in custom lengths up to two meters.

As well, longer lights can be created simply by removing the end caps of multiple units, and staggering the diffusers along the overall length to keep the lights aligned, creating a continuous line of suspended light.

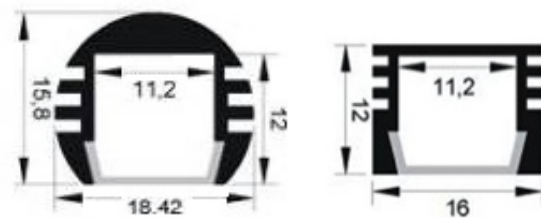

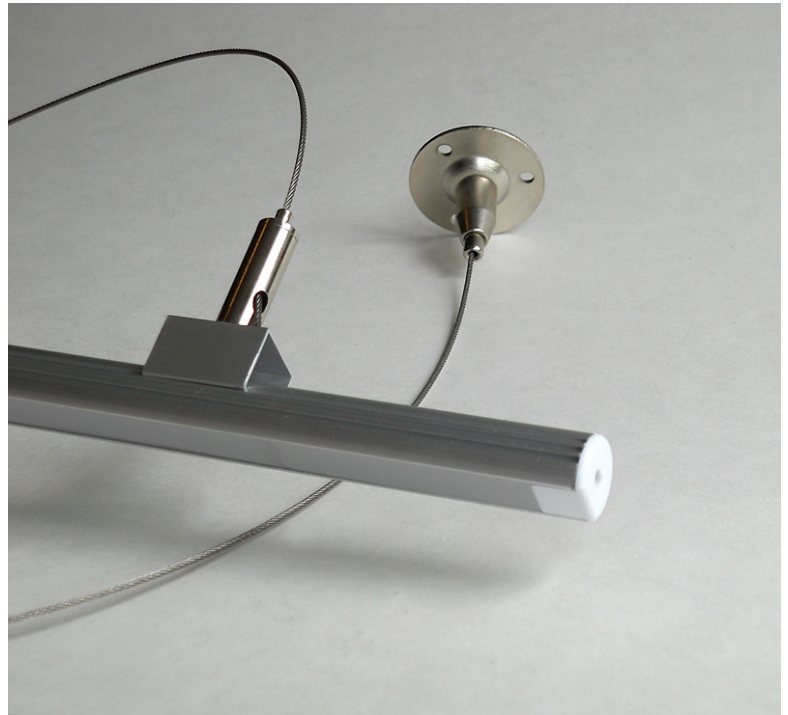

Select from a variety of color temperatures to complement and enhance any environment.

- 2700K incandescent warm white
- 3000K clean white
- 4000K natural white
- 6000K cool white

A two-meter long steel wire suspension system is included, which can connect to any points along the LED channel.

The suspension height can be easily adjusted, with a maximum suspension of two meters.

Powered by a 24 volt DC power supply (sold separately). May be dimmed using a Lumicrest PWM dimmer (also sold separately).

Round or square profile options

Perfect for offices, galleries, retail, residential and hospitality environments.
